

Project Progress Presentation

Worth:	30% (10% Individual, 20% Group)
Due:	Week 7, Sunday 23:59
Submit to	Online Canvas
Teamwork:	<p>Teams can be made up of:</p> <ul style="list-style-type: none">- 1 Individual- 2 people (Pair)- 3 people (Trio)- 4 people (Quad) <p>Please note, the more people you have in your team will increase the expectation of high quality the submission and the marks will reflect this expectation</p>
Deliverables:	<ul style="list-style-type: none">- Recorded Video- PowerPoint Slides (optional)- Code Files- Individual Report/s demonstrating evidence of contribution
Video Duration	<ul style="list-style-type: none">- 10minutes – any content presented after the 10minute mark will NOT be marked
Number of Slides	<ul style="list-style-type: none">- 10-20<ul style="list-style-type: none">o This is a suggested number; this will vary depending on the amount of code present in the solution.o This can include title, content, and reference slides

Instructions

You must prepare a project progress presentation illustrating how the development of your concept for a web-app is progressing. This should be treated as an update to present your progress to your Senior Development Team (Course Academics) for review. This will include information about the ongoing development of the practical project will continue over the remainder of this course. As such, it should incorporate the techniques/technologies defined in the course outline and be achievable in the time frame of this course.

Your presentation should include:

- A description of the purpose and core functionality of the web-app
- Updated Wireframes or mock-ups illustrating your web-app concept.
- Any external technologies required to construct this web-app (e.g., APIs, style guidelines, package libraries)
- Technical hurdles you anticipate and logical plans to overcome these issues.
- An action plan illustrating progress milestones and goals
- Presentation should include a discussion about the difficulties you have faced during this project and how you will overcome them in the remaining time in the course (e.g., coding difficulties, time constraints etc.)
- Should demonstrate that there is some code present in the project that works (note this does not mean a fully functioning web-app, but some code should be present)

It should **NOT** include:

- A completely unrealistic or over-ambitious idea for a project with no concrete idea of how it will be achieved.

- Any materials submitted for assessment for another course.
- Any materials prepared by another person/team. All materials presented must be your own work.

Your presentation will be assessed against both verbal and visual criteria, as either a physical or digital presentation during the tutorial. Online submissions must contain a PowerPoint file of slides used in the presentation, and a video submission. Video format is up to you but is marked on the same criteria as the physical presentation. One approach is to record a Zoom session with your team, screen sharing your slide deck. Try to use an engaging presentation style to clearly communicate your concept in a way that your audience will understand.

Please prepare for your presentation by rehearsing and ensure you do not go over time. Presentations should be no longer than the time limit will be marked, any content presented after this will not be marked.

Teamwork

This assignment has two components, all members of a team must be present and participate in the presentation. Each member must also submit a brief report (with or without images etc.) to provide evidence of their contribution to the project. See Marking Rubric below.

How to submit your assignment

The files must be submitted to Canvas by 23:59, Sunday of Week 7.

Upload a single Zip/RAR Folder that contains your slides and pre-recorded video using the following naming convention for the folder:

A1_GroupName.zip OR A1_GroupName.rar

Adverse Circumstances

If you are unable to complete a presentation in the manner described above for any reason, you are advised to make an application for Adverse Circumstances, and to make this as early as possible so that alternative arrangements can be made for your assessment.

Please Note:

The only way to get an extension is through the adverse circumstances system – extensions cannot be granted via for any reason.

Marking Rubric

See Canvas for Rubric.
